2:00 p.m.

A new “nature playground” in the great outdoors in a previous generations–

Each morning after a brief session in the classroom, we would head out to you. It will be like drinking water from a fire hydrant. Just embrace the summer. Each of us had heard stories from the previous classes but

On the first day, Dr. Becky Barlow summed it up best when she

Joel Martin and his wonderful staff at the Solon Dixon Center went

On May 19, 2010, 26 anxious students arrived at the Solon Dixon

discipline we would like to pursue after we graduate.

from seedling to product, but also helps give us an idea about which
group of professionals not only has allowed us to see what happens before, but was able to take a mental break.

From riding the many dirt roads to playing football, wiffle ball or ping-pong to just sitting on the front porch of the dorm, it was refreshing to have the opportunity to bond as a class. This camaraderie not only has helped us

This was typically the normal routine for most of the summer. There was not a lot of free time, but when there was, we took advantage of it. This was the normal routine for most of the summer. There was not a lot of free time, but when there was, we took advantage of it.
