Re: "TigerMeds Personalized Prescriptions" Pilot Program

To Whom It May Concern:

The Auburn University Pharmaceutical Care Center (AUPCC) is pleased to introduce an exciting new service that is being piloted in 2020 called "TigerMeds® Personalized Prescriptions". Through this program, 1,000 beneficiaries of Auburn University's health insurance program who meet certain criteria will have the opportunity to **voluntarily** participate in this program.

Through "TigerMeds® Personalized Prescriptions", AUPCC pharmacists will collect saliva which will be analyzed for genetic markers that provide information on how medications interact with the body. This is often referred to as "pharmacogenomic testing." These data **may** be able to guide health care professionals in selecting the best medication and dosage, a personalized prescription, for the individual. This is a new field of science that is very promising. We are excited to conduct this pilot project for beneficiaries of our own health care plan.

You or any covered dependent on your health insurance might be eligible for this service if all of the following criteria are met:

1. The participant must be enrolled in the 2020 AU Health Insurance Plan.
2. The participant must be 19 years of age or older.
3. The participant must be taking one of the medications listed in Table 1 on a chronic basis.
4. The participant must complete a laboratory consent form.

Table 1: Medications

Medication Class:	Tricyclic Antidepressants (TCAs):	SSRI or SSNRI Antidepressants:	ADHD Medication:	Antiplatelet Medication:	Antiestrogen Medication:
Medication List:	Amitriptyline Doxepin Imipramine Nortriptyline	Citalopram Escitalopram Fluvoxamine Paroxetine Sertraline Venlafaxine Desvenlafaxine	Atomoxetine (Strattera®)	Clopidogrel (Plavix®)	Tamoxifen

If you or your covered dependent(s) meet these criteria and are interested in participating, please email the Auburn University Pharmaceutical Care Center (AUPCC) at aupcc4u@auburn.edu or call 334-844-4099 for more information. Once enrolled in "TigerMeds® Personalized Prescriptions", you will benefit from the quality

and personal care provided by the AUPCC clinicians. **In addition to excellent care, you will also receive the following benefits:**

- **Free** saliva testing (pharmacogenomic testing).
- **Free** personalized prescription consult.
- **Free access** to genetic counselors if needed.
- **No co-pay** for initial or follow-up AUPCC appointments.
- **Free access** to classes, one-on-one instruction and educational materials.

We would love to hear from you!
